SOMBRA FABRIC

DURABLE BLACKOUT
BLIND FABRIC

PVC BASED WIPE CLEAN BLACKOUT FABRIC

Sombra is a PVC based fabric that offers very effective light exclusion. This durable fabric can be used in all areas requiring light exclusion such as conference rooms, galleries, school and university labs.

Sombra blackout fabrics are extremely durable and hard wearing. They have a smooth non-porous surface which makes them stain resistant and easy to clean.

Ebony	0	4	0	4	0.72

T% : Transmittance

R% : Reflectance

S-C : Shading Co-efficient

WHY CHOOSE SOMBRA FABRIC?

Sombra is more than just an effective blackout fabric.

The fabrics PVC construction makes it extremely durable and its smooth, non-porous surface makes it stain resistant, allowing the fabric to be easily wiped clean with a damp cloth.

Sombra is a completely colourfast fabric that can also be cleaned using disinfectants without being damaged.

These properties and features make the Sombra blind fabric a suitable option for a number of different applications and environments.

The blackout properties make it ideal for seminar rooms and conference facilities.

The stain resistant nature and ease of cleaning make it perfect for healthcare facilities, hospitals, schools and reception rooms.

I would like to thank the Kaydee team for their hard work and helping us achieve PC despite a extremely difficult programme
